Water Ionizer Brand Comparisons

When evaluating the purchase of a water ionizer, there are some important comparison points to keep in mind:

- ◆ **Filter material:** No other water ionizer uses more effective or safer filtration than the Ionizer Plus®. Many companies use silver for their filters to keep bacteria levels in check. However, this concerns the E.P.A. because silver is a heavy metal that eventually accumulates in the liver. Our filters do not use silver. The Ionizer Plus controls virus through a completely safe ultraviolet process with no side effects. If you are considering equipment that has silver-impregnated filtration, make certain that it is manufactured to E.P.A. specifications and is E.P.A. listed. See www.epa.gov for further information.
- ◆ **Filter Effectiveness:** Our space-age technology filters remove everything larger than **.1 micron** (one-tenth of a micron). This feature, exclusive to the Ionizer Plus, eliminates all bacteria in the water including e.coli, giardia, and crypto sporidium, as well as any biological weapons-grade bacteria such as anthrax, SARS, etc.
- ◆ **Filter Life:** Ionizer Plus filters last an average of one year for a family of four.
- ◆ **Filter Replacement Cost:** When evaluating the overall cost of a unit, be sure to factor in filter replacement cost. If the unit is low priced, but the filters are high priced and/or short-lived, you are not actually saving money.
- ◆ **Unit Memory:** Low quality units lose their memory when unplugged or when the power fails, leaving you unable to tell when to change your filter. Our unit retains its memory.
- ◆ **Flow Monitor:** An audible signal will alert you if the water flow rate is too high.
- ◆ **Ultraviolet Technology:** UV light is the best way to eliminate viruses in the water. No other method is as effective. Our UV light lasts an average of 12 years and will signal you when it needs replacement.
- ◆ **Diagnostics:** The Ionizer Plus unit performs all of its own diagnostics via on onboard computer.
- ◆ **Single Point of Contact:** High Tech Health is your single point of contact for any and all questions, supplies, parts, filters, repairs, etc. We stock, sell, ship, inventory parts, and service the units all from one location.
- ◆ **Company Reliability/Reputation:** High Tech Health has been around for more than 12 years. Many companies in this business come and go with relative frequency (40 companies in the last three years alone). This is important because:
 - **When you need a replacement filter – we'll still be here**
 - **If you have questions, we'll still be here**
 - **If you have a repair issue – we'll still be here**
 - **If you need a replacement part – we'll still be here**
- ◆ **Guarantee:** The Ionizer Plus comes with a 30 day, money-back guarantee. If you are not completely satisfied with the unit, we will refund your money, no questions asked.

We invite you to compare our product and you will see why the Ionizer Plus is Used and Recommended by more health practitioners than any other water ionization unit.
